Greetings,

I am forwarding two items that may be useful for the pre-meet this morning.

The SJTSP WQ Outline is the same outline I sent out a couple weeks ago (no changes because I have received no comments).

The Landau\_SJR\_Accord\_Oct2012.pptx is my draft PowerPoint up to this point. It is currently at 41 boring slides, with place holders for the 303(d) and FERC 401 Cert discussions. I hope to put in some pictures and graphs that will enliven the PowerPoint a bit, but haven't wanted to do that until after this meeting.

Ken
